

ecOLUTION

Milizid

Powdery sanitary cleaner and limescale remover in water soluble portion bags

Area of application

Suitable for effective cleaning of all acid-resistant materials in sanitary and wet rooms.

Application

Cleaning fittings, fixtures, walls, floors:

Powdery sanitary cleaner for use with the original DR.SCHNELL ECOLUTION hand spray.

1. Fill one ECOLUTION STICK MILIZID into the ECOLUTION HAND SPRAY
2. Subsequently top up the hand spray with 500 ml of cold clean water
3. Use the red spray head to close the hand spray
4. Subsequently thoroughly shake the filled and closed hand spray (for abt. 30 – 45 seconds)
5. Apply the product solution to the cleaning textile and spread on the surface to be cleaned, and always use clean water for finishing and/or rinsing.

*All ECOLUTION products result in lower carbon emission compared to traditional DR.SCHNELL products. Achieved through heavily reduced packaging content (plastic used is certified as recyclable) and ultra-high concentrated formulas as calculated per DIN ISO 14067 Scope 1-3. Further information can be found in the respective product data sheet. Residual emissions offset by the Chacayes Hydroelectric Project in Chile. More information at: www.dr-schnell.com/Nachhaltigkeit

** Based on the packaging weight of 20 units of 500 ml DR.SCHNELL ready-to-use bottles with spray head

Product characteristics

- Effortlessly removes limescale, rust, urine stains, skin lipids, cosmetic/cream residue and lime deposits
- Special effluent effect with lime and dirt blocker effect
- Stand-up pouch made from certified recyclable mono-material
- Contents: fully dissolving STICKS without waste
- Use in a hand spray with bottles made from 100% recycled material
- 20 x 0.5 l application solution in a sachet
- *Carbon-neutral: remaining emissions are offset through climate projects
- *Min. 95% reduction in CO₂ emissions compared to 20 x 0.5 litres of DR. SCHNELL Ready to use bottles with spray head (calculated as per ISO 14067 Scope 1-3)
- 98% less packaging waste **

Note

Fully lift up toilet seat prior to application. Water non-acid-resistant joints and fittings prior to cleaning. Always rinse the floors, walls and fixtures with fresh water after cleaning. Sticks / portion bags dissolve on contact with aqueous media, therefore do not hold in sweaty / moist hands or store on wet surfaces. Store sticks / portion bags in a cool, dry place. After 30 to 45 seconds, the protective film will have completely dissolved and the cleaning solution activation and production process begins. After 3 minutes (depending on mechanical influences such as shaking, stirring, etc.), this process will also be complete. Please note that consistency (powder-based), mechanics (shake/stir intensity), shelf life and occupational safety will determine the length of the process. The shelf life of the sticks is 1.5 years from the production date.
