

PERO CHLOR

Chlorine-based special cleaner and mould remover

Area of application

For alkali-resistant surfaces and objects in sanitary/wet areas (e.g. in sanitary, shower and swimming pool areas, and sports halls) and commercial food processing (e.g. kitchens, cold-storage rooms). Cleans, bleaches and disinfects in one work process. Effectively removes black stains caused by fungal infestation, and is very good at preventing the formation of unwelcome odours in drains, siphons and rubbish bins.

Application

Major soiling is removed first. The 1 – 5 % solution is foamed up with a special device (e.g. HD device with foam mechanism, foam cannon, low-pressure foam device). There is also the possibility of manually applying PERO CHLOR intensive cleaner with a 5 – 10% solution using a cloth, pad, sponge or pressure sprayer. In case of stubborn stains e.g. in toilets and drains, use in concentrated form. After an application time (approx. 10 – 20 minutes), thoroughly rinse the surfaces and objects with drinking-quality water.

Product characteristics

- Bleaching cleaning
- Easily removes even the most stubborn fat/oil and egg-white stains
- Good adhesion, which intensifies the cleaning effect
- Easy to wash off
- Effective removal of black mould

Note

PERO CHLOR special cleaner and mould remover only has a limited shelf life due to the chlorine releasing agent contained therein. Do not use with acidic products. Test material compatibility on an inconspicuous area. Coloured fabrics will bleach upon contact. Application solution for immediate use. Always keep product closed.

Technical information

Carton of 12 x 1 l bottles

Order No. 36138
